EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thor Nielson on August 16, 2004.

The application has been amended as follows:

- (a) In claim 111 at line 1, "structure" has been deleted and replaced with --method--.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The claims 59-61, 63-64, 66-79, 81-83, 85-112 are deemed in condition for allowance because no prior art was found teaching or suggesting nanoparticles attached to DNA within an R-loop or the association of R-Loops with electronic devices. The closest prior art is Natan et al (US 5,609,907), which teach an electrode, biomolecules (e.g., protein and/or nucleic acid) and nanoparticle, but do not teach or suggest R-loops.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
